247

Candidates evaluated

14

Scoring dimensions

IN THIS REPORT

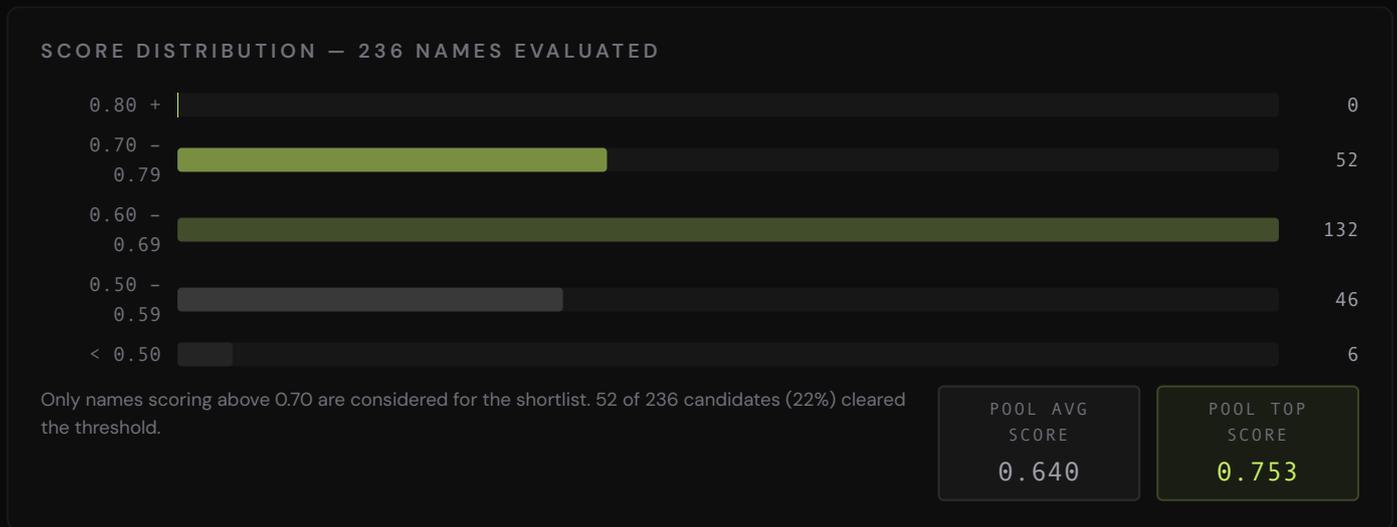

- Executive summary with score distribution
- Complete brief on file
- Competitive phoneme landscape -- your shortlist vs. the market
- Scoring methodology -- 14 dimensions across 3 factors
- Top 20 shortlist: Brand Archetype + phonetic score per finalist
- 8 deep-dives: phoneme profile, archetype, name construction, context test, IP guidance

OVERVIEW

Executive Summary

This proposal covers the naming engagement for **Meridian Labs**. 3 adversarial generation teams produced 247 candidate names, each evaluated across 14 phonetic, structural, and semantic dimensions. The shortlist below represents the highest-scoring candidates from across all teams.

<p>247</p> <p>NAMES GENERATED</p>	<p>236</p> <p>NAMES SCORED</p>	<p>52</p> <p>ABOVE 0.70 THRESHOLD</p>	<p>+18%</p> <p>TOP PICK VS. POOL AVG (0.640)</p>

TOP RECOMMENDATIONS

PRIMARY RECOMMENDATION

1 **Terio** **0.7529**

/terɪɑ/ — Coined PI 0.27

DYNAMIC CONNECTOR

WHY THIS NAME

Terio leads the shortlist with a composite score of 0.7529. The /t/ opener delivers directness and clarity; the /e/ vowel adds clarity and energy. The hard onset and bright vowel produce a precision-first profile -- technical and sharp without coldness. Its dominant signal -- Reliability and Energy -- align closely with the brief's emphasis on fast and reliable. The name is classified as coined. A tension score of 0.75 confirms it sits firmly in the optimal zone -- distinctive enough to be remembered, familiar enough to be trusted on first contact.

CATEGORY

AI infrastructure platform

NAMING TYPE

Company / startup

TARGET AUDIENCE

ML engineers and AI infrastructure leads at Series B+ startups and mid-market technology companies. Technical buyers who value precision naming and distrust marketing-heavy brand language.

PRODUCT DESCRIPTION

Developer platform for AI infrastructure teams. Manages compute provisioning, model versioning, and experiment tracking for ML engineers building production AI systems at scale. Replaces fragmented cloud console workflows with a unified ops layer.

DESIRED ATTRIBUTES

fast

reliable

developer-friendly

scalable

intelligent

TARGET MARKETS

English

HOW TO EVALUATE YOUR SHORTLIST

- 01 Say each finalist out loud in three contexts:** "We are [Name]." — "[Name] just raised \$10 million." — "Download [Name] today." The name that works across all three is usually the right one.
- 02 Share your top 5 with two or three colleagues.** Ask each to rank them without explaining why. Alignment on first impressions predicts long-term adoption.
- 03 Use the domain links in each deep-dive card** to check .com availability without copy-pasting. Availability is a hard constraint — check it early.

CONTEXT

Competitive Phoneme Landscape

The following competitor names were analyzed using the same 14-dimension scoring engine applied to your candidates. This maps the phonetic territory each competitor occupies and informs how your shortlist is positioned relative to the market.

COMPETITOR	PI	ARCHETYPE	ENERGY	WARMTH	DOMINANT TRAITS
Weights and Biases	0.23	Dynamic Connector	 0.60	 0.57	energy speed precision
MLflow	0.38	Trusted Companion	 0.49	 0.69	comfort warmth friendliness
SageMaker	0.27	Dynamic Connector	 0.61	 0.58	energy reliability speed

HOW TO READ THIS

Energy reflects phonetic drive and forward motion (plosives, fricatives, sibilants). Warmth reflects approachability and softness (nasals, liquids, open vowels). Dominant traits are the top three psychoacoustic dimensions from the 14-point scoring model. Names in your shortlist were generated to explore distinct territory from these positions.

POSITIONING GAP ANALYSIS

Your top picks (Terio, Valer, Rexia) sit in higher-energy territory than the competitive set (+0.05 energy vs. the 3-name competitor centroid). They read as more assertive and forward-moving -- a phonetic signal of category leadership. Warmth differential is modest (-0.03), so the positioning leans on drive rather than approachability.

PROCESS

Methodology

How we arrived at your shortlist. Three adversarial teams, fourteen scoring dimensions, four composite factors -- one objective: find names that feel right before anyone knows what they mean.

01

Adversarial Generation

Three independent teams generate names from different angles: direct brief interpretation, competitor-aware positioning, and unrelated category inspiration. This eliminates groupthink.

02

Four-Factor Scoring

Every candidate is scored across four independent factors: Semantics 30% (meaning, emotion, surprise), Structure 25% (syllables, balance, memorability), Sound Symbolism 30% (phonetic alignment, fluency, cross-language safety), and Placek Tension 15% (surprisingly-familiar positioning score).

03

Tension-Informed Ranking

The tension factor ensures comfort-trap names are deprioritized in favor of names that earn attention. Optimal tension score: 0.75+. Names scoring below 0.50 feel generic regardless of structural quality.

04

Shortlist Diversity Curation

The shortlist is curated to ensure phonetic and structural diversity. No more than 50% of names may share the same structural type (coined, compound, etc.), and no more than 4 names may share the same initial sound pattern. This prevents the shortlist from clustering around a single style -- unlike flat ranked lists, every slot is meaningfully distinct.

GENERATION RUNS

TEAM	CANDIDATES	TOTAL DURATION
Category Adjacent	83	1.4s
Competitive Differentiation	78	1.3s
Cross-Category Transfer	86	1.3s

Total candidates generated: 247

PHONETIC DIMENSIONS REFERENCE

Each candidate detail page includes a Phonetic Personality chart showing scores on these 14 dimensions. A score near +1.0 means the name strongly projects the quality. Near -1.0 is the opposite. Near 0.0 is neutral. Scores reflect the phoneme-level acoustic associations validated in academic literature.

Energy — Vitality, activation, liveliness

Authority — Command, gravitas, expertise

Innovation — Novelty, forward-thinking quality

Reliability — Trustworthiness, stability, dependability

Precision — Technical exactness, accuracy, rigor

Warmth — Human connection, approachability

Elegance — Refinement, grace, sophistication

Power — Strength, force, physical potency

Speed — Quickness, agility, rapid movement

Luxury — Premium quality, exclusivity, prestige

Comfort — Familiarity, ease, safety

Friendliness — Likability, warmth, approachability

Lightness — Delicacy, airiness, gentleness

Daring — Boldness, risk-taking, adventurousness

PHONETIC INDEX (PI)

The **Phonetic Index** is a single summary score that captures how strongly a name projects its dominant acoustic character. It is computed as the average of a name's three highest-scoring dimensions from the 14-dimension personality chart — meaning it rewards names with clear, concentrated phonetic identity rather than flat, undifferentiated profiles.

Interpreting the score: A PI of **0.70 or above** indicates a name with a strong, immediately legible phonetic character — the sounds carry meaning before the word is understood. Scores between 0.55 and 0.69 are competent but may lack distinctiveness in a crowded field. Below 0.55, the name's acoustic profile is too diffuse to contribute to brand recall. The PI appears in both the ranked shortlist and each candidate's detail page.

RESULTS

Top 20 Candidates

Ranked by composite score. Each name is evaluated across semantic resonance, structural quality, phonetic alignment, and Placek tension positioning (15% weight).

Score interpretation. Composite scores above 0.70 indicate strong candidates across all four factors. Scores are relative to the brief parameters -- a 0.71 for one brief may represent a different quality profile than a 0.71 for another. **Tension scale:** 0.0 = too familiar, 0.5 = balanced, 1.0 = optimal tension zone (surprising yet instantly credible).

INVENTED COINAGE. NO DICTIONARY ANTECEDENT -- MEANING IS CONSTRUCTED ENTIRELY FROM PHONETIC SIGNALS. THIS GIVES THE BRAND FULL SEMANTIC OWNERSHIP: THE NAME MEANS EXACTLY WHAT THE COMPANY MAKES IT MEAN. TWO SYLLABLES -- THE PROVEN CADENCE FOR BRAND MEMORABILITY. THE STRESSED/UNSTRESSED PATTERN CREATES AN INVOLUNTARY RECALL HOOK. HARD STOPS (K, T, P) PROJECT PRECISION AND FORWARD MOTION -- THE REGISTER OF CATEGORY-DEFINING SAAS AND FINTECH BRANDS.

TRADEMARK SEARCH

Search **Datal** on **USPTO TESS** under Class 42 (Software / SaaS). Also check **EUIPO** for EU coverage.

Voxa does not perform trademark clearance. Consult a trademark attorney before adopting any name.

Zenium

/ZENIUM/ say it: ZEHNEEUHM

Blend -- 2 syllables, 6 characters -- Tension: 0.83

BRAND ARCHETYPE Dynamic Connector E:0.57 W:0.62

High energy with approachability. Built for momentum that keeps people at the centre.

0.7335

COMPOSITE SCORE

TOP 3% OF 236

0.24

PHONETIC INDEX

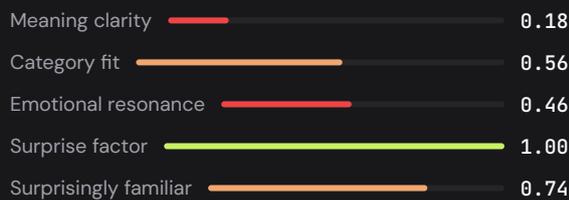

ASSESSMENT

Zenium (0.7335 composite). The /z/ opener gives the name forward-moving precision, while the /e/ vowel extends it with clarity and energy. Fricative opener with a bright vowel reads as agile and modern -- the register of infrastructure brands built for speed. A tension score of 0.83 confirms it sits in the Placek sweet spot: surprising enough to hold attention, familiar enough to earn instant trust.

MORPHEME BLEND. TWO SEMANTIC UNITS FUSED INTO A SINGLE PHONETIC OBJECT. THE BLEND RESOLVES AS A WHOLE -- THE LISTENER PROCESSES EACH ROOT BRIEFLY BEFORE THE COMBINED MEANING CONSOLIDATES. TWO SYLLABLES -- THE PROVEN CADENCE FOR BRAND MEMORABILITY. THE STRESSED/UNSTRESSED PATTERN CREATES AN INVOLUNTARY RECALL HOOK. LIQUID CONSONANTS (L, N, R, M) CREATE A FLOWING, APPROACHABLE REGISTER -- BUILDS LONG-TERM AFFINITY OVER IMMEDIATE AUTHORITY.

0.30

PHONETIC INDEX

ASSESSMENT

Bezer (0.7301 composite). The /b/ opener projects warmth and groundedness, anchored by a /e/ vowel carrying clarity and energy. The phonetic combination gives the name a distinctive and consistent signal across verbal and written contexts. A tension score of 0.75 confirms it sits in the Placek sweet spot: surprising enough to hold attention, familiar enough to earn instant trust.

INVENTED COINAGE. NO DICTIONARY ANTECEDENT -- MEANING IS CONSTRUCTED ENTIRELY FROM PHONETIC SIGNALS. NEXT STEPS

Ready to Move Forward

Your shortlist is ready for stakeholder review. The next phase involves trademark screening, domain availability, and market testing.

1. STAKEHOLDER REVIEW

Share this proposal with decision-makers. Gather reactions before narrowing.

2. TRADEMARK SCREENING

Run top 3-5 names through preliminary trademark search in target jurisdictions.

3. DOMAIN + SOCIAL AUDIT

Check .com availability, social handle availability, and SEO implications.

4. MARKET VALIDATION

A/B test finalists with target audience for recall, preference, and association.

VOXA STUDIO -- \$4,999

This proposal evaluated **247 candidates** against your brief. Studio runs the same engine against **1,500+ candidates** -- 5x the pool -- and adds the Placek strategic framework to derive your naming criteria from competitive positioning rather than category defaults.
